MEMORANDUM FOR THE RECORD

**SUBJECT: Staffing System
Language Development Program**

25X1A A meeting was held at Magazine Building on 23 May 69
25X1A on the Staffing System and Language Development Program.
In attendance were [REDACTED] Chief, PMCD/OP; and
[REDACTED] representing OCS/SIPS. The following
is a synopsis of the points covered during the meeting.

A) Staffing System

- 25X1A 1) Upon asking [REDACTED] to explain the steps that PMCD must take in processing a T/O change, he very briefly explained a few of the auditing procedures that are performed (i.e., checking the change against authorized ceiling limits, average grade authorization). Should the change violate an Agency limit/authorization, PMCD must then resolve the difference with the help of OPPB and the components involved.
- 25X1A 2) [REDACTED] stated that he was open for any worthwhile changes to the T/O system. However, the current system is good and fulfills all of PMCD's requirements. He also stated that there are no major problem areas with the current system. He did feel that it would be helpful to include Header/Column Titles on all totals that do not presently have them and also include Authorized Ceiling totals on the PCR.

25X1A

- 3) The possibility of PMCD incorporating the Staffing System Coding function in their office in lieu of the present system whereby a separate coding clerk in Statistical Reporting Branch is employed for this purpose was discussed. [REDACTED] was agreeable in pursuing this further upon a complete presentation of the coding system. It was mutually agreed upon that we would investigate this and schedule another meeting in the near future to discuss the matter further.

25X1A

- 4) The possibility of having the P.C.R. Control Number serve a dual function as both a control sequence number and an Organizational Indicator (i.e., Dir., Off., Div, Branch, Unit, etc) was then discussed. [REDACTED] stated that he could see no benefit or significance in having such a number since the recipient of a P.C.R. would not want to search thru a 18-20 character number to determine the organizational unit when he could find the same information by paging back thru the report.

B) Language Development Program

25X1A

- 1) A preliminary report layout (see attached) was presented to [REDACTED] for approval. He stated that the layout was good and contained all of the necessary information.

25X1A

- 2) [REDACTED] proposed that the report should list all employees who possessed any language skill whether they met a language requirement or not.

25X1A

In conclusion, [REDACTED] felt that the current Staffing System is good and could not offer any significant suggestions for improving the system.

25X1A

GP- Gort. Printing 4 Feb 70
(DATE)

FORM NO. 101
1 AUG 54

REPLACES FORM 10-101
WHICH MAY BE USED.

(47)

1. Automatic Reassignment ^{of personnel} with position/slot.

Will take place when a position/slot is reassigned within an office or division not involving changes in occupational series, service designation, position title or grade.

Note: This currently takes place when an office code and a headquarters code remains the same. If the headquarters code of the position changes, the employee is listed as Pending Reassignment.

Problems:

1. The employee's FAN number is not automatically changed. This is not accomplished until a Request for Personnel Action (Form 1150) is submitted by the receiving Component's Budget and Fiscal Officer.

2. Approximately 25% of the time, the automatic reassignment should not have taken place. This necessitates the submission of a Form 1150 to reassign the employee back to his parent office/division. This is not as great a problem as it appears, if historical reporting is only done at an office level since the personnel action would have to be prepared anyway to reassign the employee to a different position.

If historical reporting is done to a lower than "OFFICE" level, this would necessitate deleting the erroneous data in the historical record.

12 Mar 70

Reorganization

What happens when different levels of organization change.

- A. Automatic reassignment with slot
- B. Pending Reassignment
- C. What info goes to GMP
- D. PHCD needs what info.

Remove only of Job

Just notify Manpower system & update text only.

Position Inventory

Do they automatically reassign personnel when a slot moves??
